

Because our town is situated far away from the sea, we decided to create our own ocean ecosystem in the form of a fish tank and a shrimp tank. We collected funds to buy all the necessary tank accessories through a wastepaper collection. We called the action "Take Stephan in Your Arms", Stephan being a lonely shrimp. We learnt how to create optimum conditions for shrimps to breed and grow, and we can pride ourselves on numerous shrimp offspring.

Total number of participants: 30

Place: Szramek High School
