

Event 1. Workshop in Szramek High School.

On April 7, 2017, a team of our students participating in the EduCO₂cean project, took part in a lecture by prof. Piotr Skubała on the extinction of the oceans and the dangers of global warming.

Event 2. Meeting with Scouts.

On April 8, 2017, we organized a meeting with Scouts on the segregation of trash and the impact of waste on marine ecosystems.

Event 3. Open Days at School.

On April 22, 2017, during the Open Days of our school, for the parents and students was prepared a presentation on the process extinction of marine ecosystems, the pollution of seas and oceans, and global warming.

Event 4. Street probe.

On 5 June we organized a street probe in our city, as a part of dissemination of the knowledge about the state of global ocean within local society. We asked passers by their attitude to ecology, the risks of the expansion of the seas and oceans and the extinction of aquatic ecosystems. The 7 students took part in this probe. Conclusion: the passers were aware that the problem of extinction of marine ecosystems exist, but they did not realize that it is so serious. They were all shocked by information that the ocean is so much polluted and so many animals and plants can to extinct.
